

# VOCATIONAL MODEL GUIDE

5TH GEN

## ALLISON TRANSMISSION VOCATIONAL MODEL GUIDE

Allison Vocational Models offer tailored vocational features, advantages and benefits to better meet the individual needs of our customers.

### HIGHWAY SERIES

Allison Highway Series automatic transmissions are designed to meet all the horsepower needs of strictly on-highway vehicles that do not require PTO operation.

### MOTORHOME SERIES

Allison Motorhome Series automatic transmissions are designed to provide enhanced performance and exceptional value to the motorhome market.

### BUS SERIES

Allison Bus Series automatic transmissions are ideally suited for Federal Transit Authority (FTA) funded transit properties, FTA-like transit properties and tour coaches exceeding 33,000 lbs GVW.

### RUGGED DUTY SERIES

Allison Rugged Duty Series automatic transmissions are suited for any vehicle that operates on/off highway and/or requires PTO operation.

### EMERGENCY VEHICLE SERIES

Allison Emergency Vehicle Series offers a complete family of automatic transmissions to meet the special needs of fire and emergency vehicles.

| ENGINE  | hp (kW)   | TORQUE                             | lb·ft (N·m) |
|---------|-----------|------------------------------------|-------------|
| 165-565 | (123-421) | 420-1850                           | (569-2508)  |
| GVW     | Ibs (kg)  | 14,000-unlimited (6,350-unlimited) |             |
|         |           |                                    |             |

| ENGINE  | hp (kW)   | TORQUE                             | lb·ft (N·m) |
|---------|-----------|------------------------------------|-------------|
| 165-650 | (123-485) | 420-1950                           | (569-2644)  |
| GVW     | Ibs (kg)  | 14,000-unlimited (6,350-unlimited) |             |
|         |           |                                    |             |

| ENGINE  | hp (kW)   | TORQUE                             | lb·ft (N·m) |
|---------|-----------|------------------------------------|-------------|
| 165-550 | (123-410) | 420-1700                           | (569-2305)  |
| GVW     | Ibs (kg)  | 14,000-unlimited (6,350-unlimited) |             |
|         |           |                                    |             |

| ENGINE  | hp (kW)   | TORQUE                             | lb·ft (N·m) |
|---------|-----------|------------------------------------|-------------|
| 165-600 | (123-447) | 420-1850                           | (569-2508)  |
| GVW     | Ibs (kg)  | 14,000-unlimited (6,350-unlimited) |             |
|         |           |                                    |             |

| ENGINE  | hp (kW)   | TORQUE                             | lb·ft (N·m) |
|---------|-----------|------------------------------------|-------------|
| 165-700 | (123-522) | 420-1950                           | (569-2644)  |
| GVW     | Ibs (kg)  | 14,000-unlimited (6,350-unlimited) |             |
|         |           |                                    |             |

## PUPIL TRANSPORT/SHUTTLE SERIES

Allison Pupil Transport/Shuttle Series automatic transmissions are ideally suited for school bus, shuttle bus and other select non-school applications.

## TRUCK RV SERIES

Allison Truck RV Series automatic transmissions are specifically designed to provide more power and more performance for truck recreational vehicles.

## SPECIALTY SERIES

Allison Specialty Series automatic transmissions provide extended torque range, higher GVW capacity and advanced electronic controls to get the most performance out of higher horsepower engines, suited for military, tactical, combat and support vehicles.

## OIL FIELD SERIES

Allison Oil Field Series automatic transmissions are the only Allison transmissions certified for well servicing rig propulsion and auxiliary power applications such as high pressure pumping and hoisting.

## OFF ROAD SERIES

Allison Off Road Series provides technologically advanced, smaller, lighter, yet very robust automatic transmissions for articulated dumps, rigid dumps and other off-road applications.

| ENGINE               | hp (kW)                 | TORQUE  | lb-ft (N•m) |
|----------------------|-------------------------|---------|-------------|
| 165-340 <sup>1</sup> | (123-254 <sup>1</sup> ) | 420-950 | (569-1288)  |

| GVW              | lbs (kg)          |
|------------------|-------------------|
| 14,000-unlimited | (6,350-unlimited) |

| ENGINE  | hp (kW)   | TORQUE   | lb-ft (N•m) |
|---------|-----------|----------|-------------|
| 200-600 | (149-447) | 520-1850 | (705-2508)  |

| GVW              | lbs (kg)          |
|------------------|-------------------|
| 20,000-unlimited | (9,072-unlimited) |

| ENGINE  | hp (kW)   | TORQUE   | lb-ft (N•m) |
|---------|-----------|----------|-------------|
| 165-800 | (123-597) | 420-1950 | (569-2644)  |

<sup>1</sup> Only available with SEM/LRTP - gasoline powered engine applications.

## FEATURES & BENEFITS

Specifying a vehicle is an important business proposition. And specifying the right transmission for the vehicle is one of the most critical decisions that will impact the performance of that vehicle and a company's bottom line. The right combination of drivetrain components will not only improve vehicle performance, it can improve the operating cost of the vehicle over its lifetime.

**PROVEN RELIABILITY AND DURABILITY** Allison Transmission has built a reputation on our ability to build transmissions that last. That is why Allison Automatics are the preferred choice for all types of medium- and heavy-duty commercial vehicles. They are engineered to meet the demands of your particular business while providing outstanding value.

**COMPREHENSIVE COVERAGE** All Allison automatic transmission models offer comprehensive coverage with 100% parts and labor. Coverage may vary by model and by application. Contact your Allison representative for details. Our extensive network of over 1,500 authorized Allison Distributors and Dealers worldwide means convenient, factory-quality Allison Transmission service is always close at hand.

**TORQUE CONVERTER** Increased shifting performance, faster acceleration, greater operating flexibility and minimal rollback are all advantages attributed to the patented heavy-duty Allison torque converter. The torque converter's cushion effect reduces shock and strain on all driveline components.

**STARTABILITY** Startability is a vehicle's capability to launch and pull a load. Simply put, it's the 'grunt' or 'get-up-and-go' of a truck. Often only the 1st gear ratio is used to judge a vehicle's startability. The truth is, one has to consider the engine torque at the required launch rpm and torque multiplication of the Allison torque converter. Manual and automated manual transmissions have to launch at very low engine rpm in order to prevent damage to the clutch. This means less torque, which is why they have very deep 1st gear ratios to help them overcome their clutch limitations. An Allison Automatic uses the full torque from the engine and multiplies it with the torque converter. Then, when the 1st gear ratio and rear axle ratio are factored in, the Allison provides greater startability.

**SHIFT ENERGY MANAGEMENT (SEM)** Allison's SEM system provides better engine/transmission integration to optimize the entire driveline system. The result is faster, smoother, more consistent shift quality; increased powertrain durability; improved performance; and an overall more efficient vehicle operation leading to greater fuel economy.

**PROGNOSTICS** Most Allison Vocational Models are now available with Allison prognostics at no additional charge. Calibrated to the vehicle's particular operating requirements, Allison prognostics monitor various operating parameters - oil level, oil life, filter life and transmission health - to determine and alert when service is due. This eliminates unnecessary oil and filter changes and provides maximum transmission protection.

**LOAD-BASED SHIFT SCHEDULING (LBSS)** To further optimize fuel economy and maintain superior Allison Automatic performance, several Allison Vocational Models feature LBSS. This feature automatically selects between Performance, Economy and Super Economy shift schedules based on the vehicle's actual payload and the grade on which it is operating. While results may vary depending on operating conditions, LBSS has proven to increase fuel economy by up to 5%.

**REDUCED ENGINE LOAD AT STOP (RELS)** RELS helps improve fuel economy for high density, stop-and-go duty cycles like pick-up and delivery applications. With RELS, the transmission automatically reduces the load on the engine when the vehicle is at a full stop. This not only saves fuel, it reduces overall vehicle emissions.

**MAINTENANCE MADE EASY** Routine oil and filter changes are the only regular preventive maintenance required with an Allison Automatic. Easily accessible integral and spin-on oil filters reduce labor costs and valuable downtime. TranSynd® TES 295 transmission fluid greatly extends oil change intervals.

**IMPROVED OPERATING SAFETY** Rollback is a concern for drivers of vehicles equipped with manuals and automated manuals because it can cause accidents and product/load damage. Since there is very little rollback on vehicles equipped with Allison Automatics, drivers don't have that concern. More vehicle control under all conditions, far less fatigue for drivers since they're not shifting hundreds of times a day and so much simpler operation than a manual or automated manual transmission means there simply aren't as many distractions for the driver of an Allison Automatic-equipped vehicle.

**CHECK THE RPMS** A driver's performance correlates to the equipment they are driving. It's physically impossible for a driver in a manual- or automated manual-equipped vehicle to shift at optimum points and behave in such a way to optimize productivity. An Allison Automatic makes the decision for the driver and makes the right shift at the right time.

**2ND REVERSE** Allison 2nd Reverse offers a second "deep reverse" in addition to the standard reverse to provide greater control and engine braking during operation on steep grades. It also enables more maneuverability when operating in confined spaces. When a vehicle is in 2nd Reverse, it will have a slow creep capability with high engine speeds. With a mechanical ratio of -17.12:1, it will have an effective torque converter multiplied ratio up to 32.5:1. 2nd Reverse provides overall better performance and enhanced applicability for a variety of applications. Available on 4700 and 4800 vocational models.

**VEHICLE ACCELERATION CONTROL (VAC)** VAC controls aggressive driving practices to improve overall fuel economy. It limits acceleration by controlling the amount of engine torque based on vehicle load.

**LIFE CYCLE VALUE** When you factor in all life cycle costs – vehicle purchase price, insurance, fuel, tires, preventive maintenance, component repair, driver wages, taxes, license, permits and retail resale value – along with the increased productivity, an Allison Automatic-equipped vehicle costs less to operate than a comparable competitively equipped vehicle.

**ENHANCED CONVERTER LOAD RELEASE (ECLR)** Improves fuel economy by reducing load on engine when the vehicle comes to a stop. With ECLR, the transmission automatically goes to neutral at a full stop and it locks the output to protect against vehicle rollback for an added measure of safety.

**FIFTH GENERATION ELECTRONIC CONTROLS** Available on all Allison Vocational Models, this next generation of Allison electronic controls offers an enhanced array of features designed to increase fuel efficiency and fuel economy for the specific needs of any application. It also maximizes transmission protection with advanced prognostics.

<sup>1</sup> Gross ratings as defined by ISO 1585 or SAE J1995. <sup>2</sup> SEM = engine controls with Shift Energy Management. <sup>3</sup> Turbine torque limit based on iSCAAN standard deductions.

<sup>4</sup> SEM and torque limiting are required to obtain this rating. <sup>5</sup> Only available with VORTEC 8.1L gasoline powered engine applications.

<sup>6</sup> Requires Allison Transmission engine-transmission combination approval. Only available in gears three through six. <sup>7</sup> Check with your OEM to ensure offerings. <sup>8</sup> Available in gears three through six.

## HIGHWAY SERIES FEATURES AND ADVANTAGES

### Shift Energy Management (SEM) torque limiting

Ratings up to 340 hp/660 lb·ft on 1000, 1350, 2100, 2200, 2350, 2500 and 2550 HS.

Ratings up to 325 hp/450 lb·ft on 2300 HS.

Ratings up to 370 hp/1250 lb·ft on 3000 HS.

Ratings up to 565 hp/1850 lb·ft on 4000 and 4500 HS.

### High density start/stop calibrations

Improves shift operation, especially in congested traffic environments.

Available on 1000, 2100, 2200 and 2300 HS.

### Reduced Engine Load at Stop (RELS)

Enhances fuel economy and helps reduce emissions.

### Oil Level Sensor (OLS)

At the push of a button, oil levels are displayed on shift selectors for easy identification.

Standard on 3000, 4000 and 4500 HS.

### Additional speeds

Five forward speeds standard on 3000 HS.

### Deep oil pan/sump standard

Optional shallow oil pan available on 1000 HS.

### Load-Based Shift Scheduling (LBSS)

This feature automatically selects between Performance, Economy and Super Economy shift schedules based on the vehicle's actual payload and the grade on which it is operating. This helps to optimize fuel economy and maintain productivity.

### Prognostics

Eliminates unnecessary oil and filter changes by monitoring various operating parameters to determine and alert when a specific maintenance function is required.

### Vehicle Acceleration Control (VAC)

VAC controls aggressive driving practices to improve overall fuel economy. It limits acceleration by controlling the amount of engine torque based on vehicle load.

### Enhanced Converter Load Release (ECLR)

Improves fuel economy by reducing load on engine when the vehicle comes to a stop. With ECLR, the transmission automatically goes to neutral at a full stop and it locks the output to protect against vehicle rollback for an added measure of safety.

## TYPICAL VEHICLE APPLICATIONS

Any vehicle that operates on highway and does not need a PTO requires an Allison Highway Series transmission

\* Replacement packages have same functions and wire number assignments, but may contain additional functions. \*\* PTOs are not available with HS Series hardware even though the wire option is shown in the package.

The Allison Motorhome Series automatic transmissions make motorhomes of any size perform better and handle easier under any road or load condition. Allison Automatics deliver the power, control and traction to help you handle any situation.

<sup>1</sup> Gross ratings as defined by ISO 1585 or SAE J1995. <sup>2</sup> SEM = engine controls with Shift Energy Management. <sup>3</sup> Turbine torque limit based on iSCAAN standard deductions.

<sup>4</sup> SEM and torque limiting are required to obtain this rating. <sup>5</sup> Check with your OEM to ensure offerings. <sup>6</sup> Available in gears three through five. <sup>7</sup> With 5th Gen controls. In ranges 3-5.

## MOTORHOME SERIES FEATURES AND ADVANTAGES

### Shift Energy Management (SEM) with torque limiting

Ratings up to 340 hp/660 lb-ft on 1000, 1350, 2100, 2200, 2350, and 2550 MH.

Ratings up to 340 hp/700 lb-ft on 2500 MH.

### PTO option available

All Motorhome Series models.

### Deep oil sump/pan standard

Shallow pan option available on 1000 MH.

### Oil Level Sensor (OLS)

At the push of a button, oil levels are displayed on shift selectors for easy identification.

Standard on 3000 and 4000 MH.

### Prognostics

Eliminates unnecessary oil and filter changes by monitoring various operating parameters to determine and alert when a specific maintenance function is required.

### Reduced Engine Load At Stop (RELS)

Enhances fuel economy and helps reduce emissions.

### Vehicle Acceleration Control (VAC)

VAC controls aggressive driving practices to improve overall fuel economy. It limits acceleration by controlling the amount of engine torque based on vehicle load.

### Enhanced Converter Load Release (ECLR)

Improves fuel economy by reducing load on engine when the vehicle comes to a stop. With ECLR, the transmission automatically goes to neutral at a full stop and it locks the output to protect against vehicle rollback for an added measure of safety.

## TYPICAL VEHICLE APPLICATIONS

### Type A and Bus Conversion Motorhomes Class 5-8

### Type C Motorhomes Class 4-5

### Motorhome

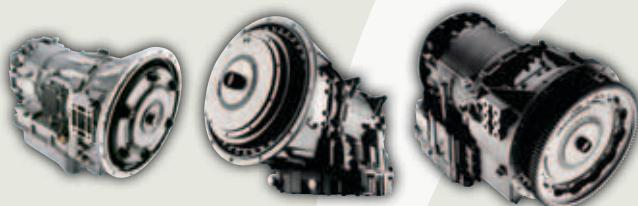

### Entertainer Travel Coach

Class 6-8 Type C Motorhomes require Truck RV Series

<sup>1</sup> Gross ratings as defined by ISO 1585 or SAE J1995. <sup>2</sup> SEM = engine controls with Shift Energy Management. <sup>3</sup> Turbine torque limit based on iSCAAN standard deductions.

### BUS SERIES FEATURES AND ADVANTAGES

#### Shift Energy Management (SEM) torque limiting

Ratings up to 270 hp/575 lb-ft on B 210 and B 220.

#### High-density start/stop calibrations

Improves shift operations especially in congested traffic environments.

Available on B 210 and B 220.

#### Reduced Engine Load at Stop (RELS)

Enhances fuel economy and helps reduce emissions.

#### Load-Based Shift Scheduling (LBSS)

This feature automatically selects between Performance, Economy and Super Economy shift schedules based on the vehicle's actual payload and the grade on which it is operating. This helps to optimize fuel economy and maintain productivity.

#### Prognostics

Eliminates unnecessary oil and filter changes by monitoring various operating parameters to determine and alert when a specific maintenance function is required.

#### Vehicle Acceleration Control (VAC)

VAC controls aggressive driving practices to improve overall fuel economy. It limits acceleration by controlling the amount of engine torque based on vehicle load. Available on select Bus Series vocational models.

#### Enhanced Converter Load Release (ECLR)

Improves fuel economy by reducing load on engine when the vehicle comes to a stop. With ECLR, the transmission automatically goes to neutral at a full stop and it locks the output to protect against vehicle rollback for an added measure of safety.

1 Gross ratings as defined by ISO 1585 or SAE J1995. 2 SEM = engine controls with Shift Energy Management. 3 Turbine torque limit based on iSCAAN standard deductions.

4 SEM and torque limiting are required to obtain this rating. 5 Only available for VORTEC 8-1L gasoline powered engine applications.

6 Requires Allison Transmission engine-transmission combination approval. Only available in gears three through six. 7 Check with your OEM to ensure offerings.

8 Available in gears two through six. 9 Only available in gears four through seven. 10 Only available in gears three through six. 11 With and without torque limiting. 12 Not approved for landfill use.

## RUGGED DUTY SERIES FEATURES AND ADVANTAGES

### Shift Energy Management (SEM) with torque limiting

Ratings up to 340 hp/660 lb-ft on 1000, 1350, 2100, 2200, 2350 and 2550 RDS.

Ratings up to 325 hp/450 lb-ft on 2300 RDS for On-/Off-Highway applications.

Ratings up to 300 hp/565 lb-ft on 2500 RDS for Refuse applications.

Ratings up to 370 hp/1250 lb-ft on 3000 RDS for On-/Off-Highway, Mixer, and Refuse applications.<sup>7</sup>

Ratings up to 565 hp/1850 lb-ft on 4500 RDS for On-/Off-Highway and Specialty PTO applications.

Ratings up to 600 hp/1850 lb-ft on 4500 RDS for HET applications.

### Oil Level Sensor (OLS)

At the push of a button, oil levels are displayed on shift selectors for easy identification.

Standard 3000, 3500, 4000, 4500 and 4700 RDS.\*

### PTO delete option

Available on 3000, 3500, 4000 and 4500 RDS.

### Deep oil pan/sump

Standard for all Rugged Duty Series models.

### Load-Based Shift Scheduling (LBSS)

This feature automatically selects between Performance, Economy and Super Economy shift schedules based on the vehicle's actual payload and the grade on which it is operating. This helps to optimize fuel economy and maintain productivity.

### Prognostics

Eliminates unnecessary oil and filter changes by monitoring various operating parameters to determine and alert when a specific maintenance function is required.

### 2nd Reverse

Allison 2nd Reverse offers a second "deep reverse" in addition to the standard reverse to provide greater control and engine braking during operation on steep grades. It also enables more maneuverability when operating in confined spaces.

### Vehicle Acceleration Control (VAC)

VAC controls aggressive driving practices to improve overall fuel economy. It limits acceleration by controlling the amount of engine torque based on vehicle load.

### Reduced Engine Load At Stop (RELS)

Enhances fuel economy and helps reduce emissions.

### Enhanced Converter Load Release (ECLR)

Improves fuel economy by reducing load on engine when the vehicle comes to a stop. With ECLR, the transmission automatically goes to neutral at a full stop and it locks the output to protect against vehicle rollback for an added measure of safety.

\*OLS is not available for 4700 RDS with retarder

1000 RDS, 1350 RDS,  
2100 RDS, 2200 RDS, 2300 RDS,  
2350 RDS, 2500 RDS, 2550 RDS

3000 RDS,  
3500 RDS

4000 RDS, 4500 RDS  
4700 RDS

\* Replacement packages have same functions and wire number assignments, but may contain additional functions.

The Allison Emergency Vehicle Series automatic transmissions are designed to meet the performance and safety needs of emergency vehicles. Fully automatic shifts provide faster acceleration, which translates to shorter trip times.

1 Gross ratings as defined by ISO 1585 or SAE J1995. 2 SEM = engine controls with Shift Energy Management. 3Turbine torque limit based on iSCAAN standard deductions. 4 SEM and torque limiting are required to obtain this rating. 5 Available in gears two through six. 6 Check with your OEM to ensure offerings. 7 Aircraft Rescue and Fire-Fighting Vehicle. 8 With 5th Gen controls. In ranges 3-5.

## TYPICAL VEHICLE APPLICATIONS

Any vehicle equipped with emergency signaling such as a siren, light bar, grill signal, porter light, etc. allowing the vehicle to ignore general traffic laws in emergency situations requires an Allison Emergency Vehicle Series transmission.

Aerial Ladder Platform

Aircraft Rescue and Fire-Fighting Vehicle

Ambulance

Hazardous Material Vehicle

Mobile Command

Center

Fire Truck Pumper - With Split-Shaft PTO

Fire Truck Pumper - Without Split-Shaft PTO  
Support Vehicle

## EMERGENCY VEHICLE SERIES

### EMERGENCY CALIBRATIONS

Emergency Vehicle Series calibrated with unique shift inhibit tolerances to meet special needs of emergency vehicles.

Low-voltage detection set at two minutes for emergency cals.

General truck cals will not permit shift into range after 10 seconds.

Emergency cals will not permit a shift into range for engine rpms above 1260.

General truck cals will not permit shift into range above 900 rpm.

No shift inhibit detection of high output speed/high throttle position for emergency cals.

General truck cals will not permit a shift into range when output speed is at or above 200 rpm and/or throttle position is beyond 40%.

## EMERGENCY VEHICLE SERIES FEATURES AND ADVANTAGES

### Shift Energy Management (SEM) with torque limiting

Ratings up to 340 hp/700 lb-ft with 5th Gen controls on 1000, 1350, 2100, 2200, 2350, 2500 and 2550 EVS.

Ratings up to 600 hp/1850 lb-ft on 4500 EVS.

### Oil Level Sensor (OLS)

At the push of a button, oil levels are displayed on shift selectors for easy identification.

Standard on 3000, 3500, 4000, 4500 and 4700 EVS.\*

### 2nd Reverse

Allison 2nd Reverse offers a second “deep reverse” in addition to the standard reverse to provide greater control and engine braking during operation on steep grades. It also enables more maneuverability when operating in confined spaces. Available on 4700 and 4800 EVS models.

### Deep oil pan/sump standard on all Emergency Vehicle Series models

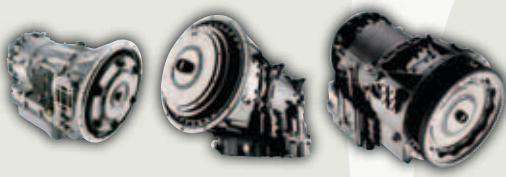

Shallow sump with OLS optional on 3000, 3500, 4000 and 4500 EVS.

Shallow pan optional on 1000 EVS.

### Prognostics

Eliminates unnecessary oil and filter changes by monitoring various operating parameters to determine and alert when a specific maintenance function is required.

\*OLS is not available for 4700 EVS with retarder

1 Gross ratings as defined by ISO 1585 or SAE J1995. 2 SEM = engine controls with Shift Energy Management. 3 Turbine torque limit based on iSCAAN standard deductions.

## TYPICAL VEHICLE APPLICATIONS

Truck-Based Recreational Vehicles

Class 6-8 Type C Motorhomes

## TRUCK RV SERIES FEATURES AND ADVANTAGES

### Shift Energy Management (SEM) torque limiting

Ratings up to 450 hp/1250 lb-ft on 3200 TRV.

### Prognostics

Eliminates unnecessary oil and filter changes by monitoring various operating parameters to determine and alert when a specific maintenance function is required.

### Reduced Engine Load at Stop (RELS)

Enhances fuel economy and helps reduce emissions.

### Vehicle Acceleration Control (VAC)

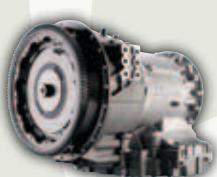

VAC controls aggressive driving practices to improve overall fuel economy. It limits acceleration by controlling the amount of engine torque based on vehicle load.

### Enhanced Converter Load Release (ECLR)

Improves fuel economy by reducing load on engine when the vehicle comes to a stop. With ECLR, the transmission automatically goes to neutral at a full stop and it locks the output to protect against vehicle rollback for an added measure of safety.

3000 TRV, 3200 TRV

4000 TRV

1 Gross ratings as defined by ISO 1585 or SAE J1995. 2 SEM = engine controls with Shift Energy Management. 3 Turbine torque limit based on ISCAAN standard deductions.

4 Gross input power rating is 340 hp/254 kW for VORTEC 8.1L gasoline powered engines. 5 Available for School Bus applications only. 6 Check with your OEM to ensure offerings.

7 SEM and torque limiting are required to obtain this rating. 8 Only available with VORTEC 8.1L gasoline powered engine applications.

## PUPIL TRANSPORT/SHUTTLE SERIES FEATURES AND ADVANTAGES

### Shift Energy Management (SEM) with torque limiting

Ratings up to 300 hp/660 lb·ft on 1000, 1350, 2100, 2200, 2350, 2500 and 2550 PTS.

### High-density start/stop calibrations

Improves shift operations especially in congested traffic environments.  
Available on 1000, 2100, 2200 and 2500 PTS.

### Oil Level Sensor

At the push of a button, oil levels are displayed on shift selectors for easy identification. Standard on 3000 PTS.

### Enhanced Converter Load Release (ECLR)

Improves fuel economy by reducing load on engine when the vehicle comes to a stop. With ECLR, the transmission automatically goes to neutral at a full stop and it locks the output to protect against vehicle rollback for an added measure of safety.

### Reduced Engine Load at Stop (RELS)

Enhances fuel economy and helps reduce emissions.

### Deep oil pan/sump standard

Shallow oil pan optional on 1000 PTS.

### Load-Based Shift Scheduling (LBSS)

This feature automatically selects between Performance, Economy and Super Economy shift schedules based on the vehicle's actual payload and the grade on which it is operating. This helps to optimize fuel economy and maintain productivity.

### Prognostics

Eliminates unnecessary oil and filter changes by monitoring various operating parameters to determine and alert when a specific maintenance function is required.

### Vehicle Acceleration Control (VAC)

VAC controls aggressive driving practices to improve overall fuel economy. It limits acceleration by controlling the amount of engine torque based on vehicle load.

\* Replacement packages have same functions and wire number assignments, but may contain additional functions. \*\* PTOs are not available with PTS Series hardware even though the wire option is shown in the package.

Your vehicles are specially built to work hard in tough conditions, day in, day out. They travel long roads, back roads and to places that have no roads. Their performance rises to a whole new level when you spec Allison Specialty Series fully automatic transmissions.

# SPECIALTY SERIES™

## TYPICAL VEHICLE APPLICATIONS

- Military
- Crane Carrier
- Equipment Hauler with Escort or Permit
- Molten Metal/Slag Hauler
- Power Plant Generator Hauler
- Heavy Equipment Hauler

## SPECIALTY SERIES FEATURES AND ADVANTAGES

### Shift Energy Management (SEM) torque limiting

Ratings up to 340 hp/700 lb-ft on 2100, 2200, 2350, 2500 and 2550 SP.

Ratings up to 600 hp/1850 lb-ft on 4500 SP.

### Prognostics

Eliminates unnecessary oil and filter changes by monitoring various operating parameters to determine and alert when a specific maintenance function is required.

### Reduced Engine Load At Stop (RELS)

Enhances fuel economy and helps reduce emissions.

### Vehicle Acceleration Control (VAC)

VAC controls aggressive driving practices to improve overall fuel economy. It limits acceleration by controlling the amount of engine torque based on vehicle load.

### Enhanced Converter Load Release (ECLR)

Improves fuel economy by reducing load on engine when the vehicle comes to a stop. With ECLR, the transmission automatically goes to neutral at a full stop and it locks the output to protect against vehicle rollback for an added measure of safety.

\* Replacement packages have same functions and wire number assignments, but may contain additional functions. \*\*Additional packages available. See Tech Data I/O Package Guides – 5th Gen Controls.

Allison Oil Field Series fully automatic transmissions are designed and engineered specifically for the rigors of oil field operations. They work harder, faster and more reliably, allowing you to stay in production longer.

\* Replacement packages have same functions and wire number assignments, but may contain additional functions.

Allison Off Road Series fully automatic transmissions are a better way to work in the dirt. They offer higher horsepower and torque ratings that not only help increase the number of deliveries daily, they allow larger payloads.

| - Deep Oil Sump w/o PTO   | RDS, EVS, SP, OFS                             | 51 <sup>4</sup> (48) <sup>4</sup>        |

Recommended oil types for all models are TranSynd™/TES 295 approved.

1 Transmission only. Does not include cooler, hoses or fittings. 2 2000 SP - Only 2000 model available with shallow oil pan.

3 Main and lube circuit filter are integral; electronic oil sensors are standard. 4 Amount of oil necessary to fill a dry transmission.

5 4430 is an SP model only - available only with deep oil pan. 6 Retarder models must use 4-inch sump without OLS.

1 Only medium-capacity available on 4700 EVS, RDS, SP and 4800 EVS.

2 Excluding 3700 SP.

## Allison Has You Covered

Our extensive network of over 1,200 authorized Allison Distributors and Dealers in North America, along with over 1,500 worldwide, means convenient, factory-quality Allison Transmission service is always close at hand.

### ALLISON BRAND PROMISE

The Allison Brand Promise is the automatic experience with an unrivaled combination of Quality, Reliability, Durability, Vocational Value, and Customer Service.
